Before the FEDERAL COMMUNICATIONS COMMISSION

Washington, D.C. 20554

In the matter of: LightSquared Subsidiary LLC Request for Modification of Its Authority for an

Ancillary Terrestrial Component

To: The Federal Communications Commission

Re: FCC File Number: SAT-MOD-20101118-00239

I am writing to urge you to approve LightSquared's request for a modification of its authority for

an Ancillary Terrestrial Component.

It is counter-productive to stand in the way of technological progress. Soon 4G-LTE speed will be the

new global standard for wireless Internet. Because of its wholesale-only business model, LightSquared

will allow many more niche players into the market, providing numerous competing options available to

the average consumer and supporting a burst of innovation in the wireless sector.

LightSquared's satellite service will also fill in the large gaps in our nation's wireless coverage. This is a

great benefit to rural America. It will also aid emergency workers with a stable communications system

that can withstand a crisis, such as Hurricane Katrina.

I hope that you take these factors into account as you review LightSquared's proposal.

Respectfully submitted,

Richard Ponce 3188 Burnham Ave Las Vegas, NV 89169 December 7, 2010
